Tim Carver, CEO, said, “We are pleased to announce our half year financial results for the period ending 30 June 2024. GQG ended the period with funds under management (FUM) across all strategies and vehicles at an all-time high of US\$155.6 billion. FUM increased 49.5% from US\$104.1 billion as at 30 June 2023 due to strong investment performance and positive net inflows into our strategies. During the first half of 2024, GQG had positive net flows of US\$11.1 billion. Our net revenue in the first half of 2024 was US\$363.1 million, an increase of 53.1%, compared to the first half of last year. During the first six months of 2024, net operating income increased by 54.9% from US\$176.4 million during the first half of 2023 to US\$273.2 million.

Our financial results were driven in large part by our investment performance over the long-term. As at the end of June 2024, our strategies continued to generate solid relative returns with lower volatility compared to their benchmarks, which we believe provides the foundation for continued business success.

GQG PARTNERS STRATEGY COMPOSITES TOTAL RETURN PERFORMANCE

Represents composite performance for GQG Partners’ primary investment strategies calculated in US dollars. Returns are presented net of management fees and include the reinvestment of all income. Net performance is calculated after the deduction of actual trading expenses and other administrative fees (custody, legal, administration, audit and organization fees). Net of fee returns also are calculated by deducting GQG’s stated annual fee for separately managed accounts, pro-rated on a quarterly basis. Net performance is net of foreign withholding taxes. Performance presented does not include composite performance achieved prior to 1 June 2016. Returns for periods greater than one year are annualized. **PAST PERFORMANCE MAY NOT BE INDICATIVE OF FUTURE RESULTS.** The complete composite track records for the above strategies can be found in GQG Partners’ 2024 Half Year Earnings Presentation. The above information is provided for informational purposes and is not intended as an offer of any GQG products or services.

We believe our positive net flows of US\$11.1 billion during the first half of 2024 reflect our clients’ trust in our approach, driven by the consistency of our long-term returns. We anticipate continued positive flows in 2024 with a reasonable pipeline of client demand across multiple geographies and channels.

We continue to offer what we believe are attractive fees relative to our competition. Our weighted average management fee for the half year period increased from 48.3 basis points in 2023 to 49.3 basis points, driven by a shift in FUM mix. As in prior periods, our revenue is overwhelmingly derived from asset-based fees, with only 5.4% of our revenues for the first half of 2024 coming from performance fees. We expect this revenue mix to remain stable over time, contributing to what we consider to be a high-quality earnings profile.

We continue to believe if we react to dynamic markets in a disciplined manner, we will have the opportunity to find solid investments for our clients over the long-term. Thank you for your trust in our business and our team,” Mr. Carver concluded.

Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to nonresident institutional investors who do not benefit from double taxation treaties.

Information about benchmark indices is provided to allow you to compare it to the performance of GQG strategies. Investors often use these well-known and widely recognized indices as one way to gauge the investment performance of an investment manager's strategy compared to investment sectors that correspond to the strategy. However, GQG's investment strategies are actively managed and not intended to replicate the performance of the indices; the performance and volatility of GQG's investment strategies may differ materially from the performance and volatility of their benchmark indices, and their holdings will differ significantly from the securities that comprise the indices. You cannot invest directly in indices, which do not take into account trading commissions and costs.
